

Product-Forage-AI

AI-Powered Product Description Generator for E-Commerce Sellers

Name: Vanshika Ahuja

University: Graphic Era University

Intern ID: (Add your ID)

Live Demo:

<https://product-forage-w3ecanzie-vanshika22.vercel.app/>

What Problem Are We Solving?

E-commerce sellers spend a lot of time writing product descriptions.

Creating engaging marketing content requires copywriting skills.

Manual descriptions are time-consuming and inconsistent.

Solution:

An AI-powered platform that automatically generates professional product descriptions from product details.

Tech Stack Selected

- **Frontend**
- **React.js**
- Component-based UI development
- Fast and interactive user experience
- **Tailwind CSS**
- Responsive and modern styling
- **Backend**
- **Node.js + Express.js**
- REST API development
- Efficient frontend-backend communication

Database & AI Technology

Database: MongoDB Atlas

- Why MongoDB?
- Flexible document-based storage
- Easy handling of product information
- Cloud-hosted database

AI Model: Groq API

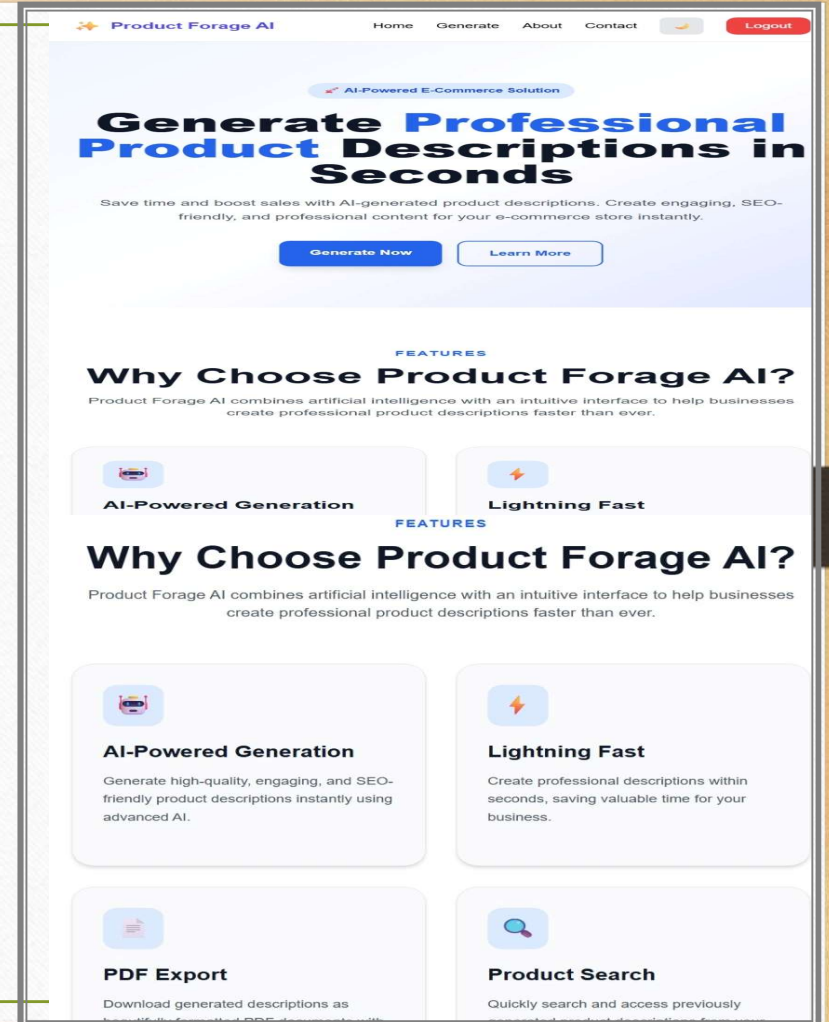

- Why Groq?
- Fast LLM responses
- Suitable for text generation tasks

GET /api/products

Purpose:

Retrieve saved products

POST /api/products

Purpose:

Store generated descriptions in MongoDB

The screenshot displays the 'Product Forage AI' web application. At the top, the header includes the logo and the tagline 'Create professional e-commerce descriptions using AI'. Below the header, a summary section shows 'Total Products: 1', 'AI Status: Online', and 'AI Model: Groq AI'. The main section is titled 'Create Product' and contains a form with fields for 'Search Product', 'Product Name', 'Ingredients', 'Weight', and 'Product Features'. A 'Premium' toggle is also present. Below the form are two buttons: 'Generate AI Description' and 'Clear'. The 'Product History' section below shows a single entry for 'Organic Millet Cookies' with a 'Premium' tone. The entry includes a detailed description, a list of ingredients (Millet flour, jaggery, almonds), and a weight of 250g. The footer contains the application name, build information, social media links, and a copyright notice for 2020.
